Browser Security

Cache / Password Store / Updated etc / Installing Apps

Modern web browsers can act as powerful work tools, but they also hold information which may compromise information security. It is important to understand why and how your preferred browser behaves the way it does, so you can make informed choices about its settings.

Date	Email Address	Password	Source	Origin of Breach	PII Disclosed	Risk Score

NOTE: ###xxx in the password field indicates that the hash password has been breached and the last 3 characters of the hash password are displayed.

Why Dark Web Monitoring is the Cornerstone of Cybersecurity

Hackers want your data?

- \$1 - \$15 for hacked email accounts
- Send SPAM emails from your account
- Up to \$30 for company login credentials
- Steal company information / intellectual property
- Up to \$35 for prescriptions records
- Hold your data for a \$3000 RANSOM

How do Hackers get in?

- **PHISHING:** Emails that appear legitimate lure users
- **INFECTED WEBSITES:** Popular websites are infected with malware to steal your information
- **SOCIAL MEDIA:** Impersonation of your account spreads infected links
- **HOLES IN YOUR COMPANY ARMOR:** Internet accessible areas of your network are scanned and attacked

North America represented 37.2% of all exposed identities detected in 2018

9.4 BILLION total identity records were found in 2018, an 88% increase over 2017

With 34 breaches discovered EACH DAY protecting your company's data has never been more important.

Our certified Dark Web specialists scour the deepest darkest corners of the web for stolen, leaked, and lost credentials, and personal information.

Because Phishing Scams WORK!

- 65% of hackers use Phishing to target users
- Spam rate of all email traffic is 55%
- Small organizations make up for 60% of current attacks
- 1 in 6 corporate users will be targets this year alone

Public WiFi is a Hackers candy store!

- When it's FREE you are the product!
- Connections are typically UNencrypted
- Many public hotspots are malicious and everything you do on them can be seen by the hacker that set it up
