What does End of Service / End of Life mean?

An indication that it's
time for
an upgrade.

End of support
for software or
hardware.

Why You shouldn't Rely on End-of-Service / End-of-Life Software or Hardware

- Many malware/ransomware attacks target outdated software
- Outdated systems are inefficient and frustrating to use

Outdated Software and Hardware

Expectations

vs.

Reality

Vintage or Economical

It's Just Slow

It'll Work Fine When Needed

Hazardous

It's Slowed Down by Viruses

It's Unreliable

End-of-Service / End-of-Life Myths

MYTH # 1

If it's not broken,
don't fix (or replace) it.

MYTH # 2

The product will
no longer exist.

MYTH # 3

I can still use the product
until it breaks.

Practical Steps to Address End-of-Service / End-of-Life Software or Hardware

Prioritize
security

Measure
productivity

Evaluate
long-term needs

Test compatibility
before migration
