Are You Aware that Cybercriminals are Searching for Your Data and Hacking Your Facebook and Email Accounts Like a Thief in the Night Coming into Your Home?!?!

What safety systems do you have in place to protect your devices and family?

There is a hacker attack every 39 seconds.	*Cybercrime is more profitable than the global illegal drug trade.*
(Source: Security magazine)	*(Source: Cybersecurity Ventures)*
By the time the average person takes a selfie and uploads it to Instagram, the next hacker attack has already taken place.	The profit from the illegal drug industry amounts to around $400 billion annually. For comparison, cybercriminals have earned a total of around **$600 billion** in 2018.

(Source: Hosting Tribunal)

Yes, cybercriminals can now get into your home anytime of the day or night through your computers, laptop, cell phone, or iPad. They can attack your kids, family, and personal data under many guises of being real, fun, and friendly.

They can track and trick you, your kids, your older parents, and teens out of personal information including names, addresses, phone numbers, banking information, passwords, credit/debit card information, and all kinds of other personal information. Because they also have **sneaky questionnaires** about pets' names, where your kids go to school, and their favorites of all kinds of things it lets **cybercriminals** create a complete **profile on your family**. Yes, you will **never know** where all that data is going.

They can **entice your children** into various schemes and **convince them** to do things, go places, and brainwash them into unwanted actions and ways of thinking. Do you realize these schemes and attacks can have **grave** and sometimes **deadly consequences?**

What are you doing **NOW** to keep your family safe and **STOP** cyberattacks? It's not just big companies' data they're after. They are also after **families like yours**.

ResTech Solutions' Managed Services has **many tools and services** to keep your family, data and computers **safe**.

We protect you from viruses, malware, ransomware, exposed vulnerabilities, and misuse of legitimate software. We block unverified or unapproved applications, and we can restrict user access.

Kevin Mitnick, a well-known IT security consultant, who spent 5 years in prison for hacking says that: **"It is much easier to trick someone into giving a password for a system than to spend the effort to crack into the system."**

Solutions to Protect Your Family

Our Raving Fans

Best Solution, Excels in Communication, Fair

By using ResTech Solutions, I'm assured I'm getting the **best solution** at a reasonable price. Period. ResTech takes the time to dissect my request into its components to be sure they solve the issue the first time. ResTech excels in communication. I know they understand my issue and my expected solution before we get off the phone.

ResTech also does a great job of scheduling appointments and letting you know when they are on the way and they are very punctual. Their pricing is very fair and ResTech works hard to keep the bill reasonable.

I recommend you give ResTech Solutions a try – there's no better way to understand the difference than by experiencing it. **You will probably save some money in the process, not because they are cheap, but because they are good!**

Convenience, Prompt & Professional, Outstanding

The single biggest benefit for us since we started using ResTech Solutions for support has been the **convenience.** When we need help all we need to do is send an email with the issue and within a matter of minutes a ticket has been created, an email sent back with the ticket details, and a set appointment to have the issue resolved.

ResTech is better than other IT firms we have dealt with in the past due to their **prompt and professional** approach to any issues we have. I can count on them to not only respond but to know what they are doing. So many other IT firms tend to make you feel your issue is not that important, but the urgency and customer service given by ResTech Solutions is **outstanding!**

If anyone is on the fence about choosing ResTech Solutions as their IT firm, they need to know working with ResTech has been the **easiest and most efficient** way to get our issues resolved. I would urge anyone on the fence to reach out one time and I will guarantee they will not go elsewhere. Not being a very technical person myself, I know I can rely on ResTech each and every time.

Instant Response, Seamless Process, Personalized Care

We are a women's fashion clothing boutique in Houston. Being in the retail world with physical and online shopping options, our technology and the software programs we use to run our business must be working at all times. **ResTech delivers instant support** so we can keep running and taking care of our customers.

Our previous IT company took too long for them to respond after we submitted a trouble ticket. Next day support is not acceptable for us yet that was typical for them. The team at ResTech quickly responds and **personalizes their interactions** and support of our business' needs. There is no learning curve as they are familiar with our technical setup – we **have more time to take care of our customers** instead of struggling to explain a technical issue with the IT support people. **They make the whole process easy for us** and we appreciate that.

There is an excellent reason that we are raving fans of ResTech – we are taken care of, period. Pick up the phone and call them to discuss your IT needs!
